

# TITAN SUBSEA INNOVATIONS, LLC

## INNOVATIVE ENGINEERED SOLUTIONS

Titan Subsea Innovations, LLC is a Houston-based subsea pipeline connector company that provides unique engineered solutions for new construction, repairs, tie-ins, abandonments, and re-routes. In conjunction with engineered solutions, Titan Subsea Innovations provides offshore technical support for product installations. Titan offers quick turnaround deliveries to clients using stock components that are essential for performing emergency pipeline repairs.

The Company's seasoned professionals have extensive experience and share that expertise with clients worldwide. Throughout their careers, the leaders of Titan have always provided top quality products designed for long-term operational integrity. Under the astute leadership of this exceptional management group, Titan Subsea Innovations establishes itself as a customer driven company dedicated to providing innovative and cost-effective products and services for the subsea pipeline industry.

## THE TITAN INNOVATIVE TEAM

**Andrew Webster - President**

Andrew has 12 years experience in the oil & gas industry, with a direct focus on the Subsea pipeline connector business. Throughout his career he has been involved in business development, business to business sales, international market development, and implementing successful marketing strategies. He served as International Sales Manager for Quality Connector Systems, LLC, one of the leading providers of Subsea connector products and services.

**Kabir Mohammed, P.E. - Principal Engineer**

Kabir has 15 years experience in the design and analysis of subsea components for the oil & gas industry. Throughout his career he has managed inventory pipeline components for shallow water applications, developed deep water pipeline repair products, and emergency repair systems. He has worked as a senior project engineer for original equipment manufacturers and as a technical consultant from his own engineering firm. His technical expertise is in the application of finite element analysis methods in the design of the pressure vessels.

Titan's product offering includes swivel ring flanges, misalignment ball connectors, mechanical end connectors, piggable wyes, subsea mechanical hot tap fittings, leak repair clamps, and project-specific solutions to meet our clients' needs. We invite you to experience the professionalism, knowledge, and dedication of Titan Subsea Innovations, LLC.
